

Thank you for choosing your fur baby with us.

I was born on: _____

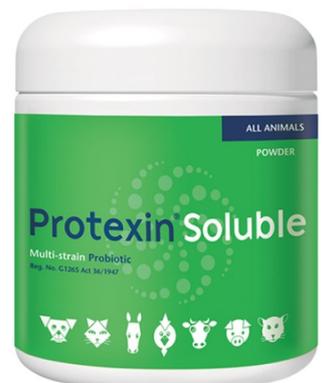

I might look like a toy but I am not, handle me with care. I like to eat Royal Canin puppy pellets with Royal Canin tin food mixed in. Don't make the pellets soft else it will make my tummy runny.

Please always have water and pellets available to me so I don't have to ask you. Never give me milk. This will cause me to get an upset stomach and make me very sick, however, Royal Canin milk for puppies or kitten has loads of vitamins and is good for me if you wanna spoil me. Please give me a warm place to sleep with my blanket.

Take me to the vet for all my shots and deworming so it stays up to date. This is very important even though I don't like it and will become a little down after the waxine. I love attention and cuddles.

Please keep me on my colloidal silver and my daily vitamin, with a little bit of protexin powder over my food. All pups which leave have been vaccinated and dewormed and checked don't just rush me off to a vet it stresses me out, make sure I am on all the things recommended with loads of love while I get used to my new surroundings. If I am a small or pocket mini breed, don't let me dehydrate, make sure I am getting some Royal Canin milk. I will only need to see a vet if I have blood in my stool, Throw up all the time, and lethargic with no energy.

All the things wiggly pets have advised must continue for the guarantee to be in place. I am looking forward to being part of your family. Love me always. 

Colloidal silver for a small pup, 5ml 2 times daily till 3rd vaccination is given. For larger pups, 10ml 2 times daily. If you want to wash your fur baby, make sure the baby shampoo or puppy shampoo is not too strong for their skin and hair dry them dry and not on a hot setting so that the pup does not burn.
